

Performance Testing Report

Date	19 November 2022
Team ID	PNT2022TMID12716
Project Name	Inventory Management System For Retailers

NFT-RISK ASSESSMENT

Project Name	Scope/feature	Functional changes	Hardware change	Software change	Impact of Downtime	Load/Volume changes	Risk Score	Justification
Inventory Management system for retailers	New	Low	No changes	moderate	Unable to sign up or register	>5 to 10%	ORANGE	User may have given incorrect details
Inventory Management system for retailers	Existing	No Changes	No changes	low	Couldn't change	<5%	GREEN	Given wrong details about user
Inventory Management system for retailers	New	moderate	No changes	moderate	Unable to modify user	<10%	ORANGE	Duplication of user arised
Inventory Management system for retailers	New	Low	No changes	No changes	Unable to predict product	<5%	GREEN	Wrong product details given

NFT DETAILED TEST PLAN

Project Overview	NFT test approach	Assumptions/dependencies	Approvals/Signoff
Inventory Management system for retailers	Incorrect username	Not registered	Login unsuccessful
Inventory Management system for retailers	Repeating same data	User updation	Login successful
Inventory Management system for retailers	Incorrect user details	Login validation	Login unsuccessful
Inventory Management system for retailers	No product updation	Database Updation	Update available products

END OF THE REPORT

Project Overview	NFT test approach	NFR-met	Test outcome	GO/ON GO decision	Recommendations	Detected/closed/open	Approvals/Signoff
Inventory management	New user	yes	Registration successful	GO	Validate login details	closed	Success
Dashboard Page	Check history	no	Product history not available	NO-GO	Validate user details	closed	Fail
Product stock	Checking updation	yes	Updation incomplete	GO	None	closed	Success
Admin page	Manage products	yes	Product stock incomplete	GO	Update product details	closed	Success
